PROFESSIONAL SUMMARY

Final-year B.Tech IT student with strong foundations in **Java, DSA, OOP, DBMS and SQL**, with **400+ DSA problems** solved. Experienced in building **full-stack applications** using **React.js, Node.js, Express.js, MongoDB and MySQL**, with a focus on **solving real-world problems** through practical software solutions. Seeking a **Software Engineer / Associate Software Engineer** role.

EDUCATION

Noida Institute of Engineering and Technology

B.Tech in Information Technology – CGPA: 8.1/10 (Expected May 2027)

M.P. College

Senior Secondary

Greater Noida, UP

2023–Present

Siwan, Bihar

2020–2022

PROJECTS

PawCare – AI-Powered Animal Rescue Platform | *React.js, Node.js, Express.js, MongoDB, Firebase, Gemini AI* GitHub

- Developed a full-stack animal rescue platform enabling users to report injured or stray animals with **images, problem details, and live location** for faster rescue coordination.
- Integrated **Gemini AI-powered PawBot** to provide animal rescue guidance, identify potential issues, and deliver basic first-aid recommendations through conversational assistance.
- Implemented an **automated NGO notification system** that routes submitted rescue reports to nearby NGOs based on the reported location for faster intervention.
- Implemented **JWT-based authentication, role-based access control, and secure REST APIs** for user management and rescue request workflows.
- Built **real-time location sharing and rescue request tracking** using Firebase, geolocation services, and React-Leaflet.

Neighborly – Community Assistance Platform | *React.js, Node.js, Express.js, MongoDB*

GitHub

- Developed a full-stack community assistance platform connecting users with **nearby volunteers** for location-based support.
- Implemented **JWT authentication and role-based authorization** for Admin, Volunteer, and User modules with protected REST APIs.
- Built a **geo-matching system** to route assistance requests to nearby volunteers based on user location.
- Implemented an **emergency alert workflow** enabling urgent requests to notify relevant nearby volunteers.
- Designed **MongoDB schemas and modular REST APIs** for users, assistance requests, volunteer matching, and request lifecycle management.

Job Portal Web Application | *React, Node.js, Express.js, MySQL, Gemini AI*

GitHub

- Developed a full-stack job portal supporting **user registration, authentication, job posting, job search, and application management** workflows.
- Built **RESTful APIs** using Node.js and Express.js with MySQL for secure data management and job application processing.
- Integrated **Gemini AI-powered chatbot** to assist job seekers with personalized job search, career guidance, and job-related queries.
- Implemented **role-based authentication and authorization** for recruiters and job seekers with secure, database-driven application workflows.
- Developed a responsive **React.js frontend** and optimized frontend-backend integration for a seamless user experience.

TECHNICAL SKILLS

Programming: Java, JavaScript

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, SDLC

Frontend: HTML5, CSS3, React.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication, MVC Architecture

Databases: MongoDB, MySQL, Firebase

Tools: Git, GitHub, Postman, VS Code, MongoDB Compass

Methodologies: Agile, Scrum, Debugging, Testing, Documentation

AI: Gemini API, OpenAI API

Soft Skills: Problem Solving, Analytical Thinking, Communication, Teamwork, Adaptability

ACHIEVEMENTS & CERTIFICATIONS

- Solved 400+ DSA problems on LeetCode and GeeksforGeeks.
- Team Lead — Smart India Hackathon (SIH), leading a 5-member team.
- Oracle AI Foundations Associate Certification.
- MongoDB: Introduction to MongoDB Certification.
- Cisco Cybersecurity Essentials Certification.
